

Data visualisation connector

Plug into the world's most powerful geospatial risk data with your business intelligence tools

We've made it easier than ever to connect our Global Risk Data with your favorite data visualisation tool allowing you to transform data from insight into action.

You can now access over 190 Verisk Maplecroft risk issues through Microsoft Power BI to achieve an instant 360° global view of the risks that matter most to your business.

Go from data to insight in seconds – all in one view

Combining the power of our data with the world's leading business intelligence tool will allow you to achieve greater insight into your risk exposure through a combination of flexibility, integration and customisation that's otherwise difficult and expensive to build.

Using Power BI will enable you to combine and analyse multiple sets of data and build custom data visualisations and dashboards.

Our data visualisation connector is available for **190+** country risk issues

Our data visualisation connector enables MS Power BI to seamlessly link with the Global Risk Dashboard (GRiD) so you can:

Pull data through from our entire portfolio of risk indices

Create custom data models

Combine our data with internal business metrics

Build and modify bespoke risk visualisations and dashboards

Share new insights across your organisation

Run updates automatically or at the push of button as new data becomes available

Why use our data visualisation connector?

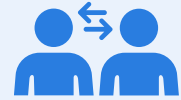

Reveal new insight to make better, data-led decisions

Integrate world-leading risk data with your own models

Save time with automated risk reporting

Communicate risk more effectively across your organisation

How does it work?

1 Upload and configure data in GRID

2 Connect and import data to MS Power BI

3 Create your custom dashboard

4 Visualise and analyse risk

About Verisk Maplecroft

Verisk Maplecroft is a leader in global risk and resilience analytics and advisory. Through a unique combination of proprietary risk data, predictive analytics and expert insight, our mission is to help multinational organisations navigate the complexities of an increasingly dynamic and interconnected risk landscape. We are part of Verisk, a leading specialist data analytics and insights provider.
